

Abinaya Arya Zaidan

INFORMATICS STUDENT | WEB DEVELOPER

Kepanjen, Malang, East Java, Indonesia | +62 812-2782-5205 | agus8u7@gmail.com | github.com/anomali01

Summary

A 20-year-old Informatics student at Semen Indonesia International University (6th semester) with hands-on experience building web and desktop applications. Proficient in JavaScript, Python, and PHP with an understanding of the Laravel framework. Known as a hardworking, diligent, and responsible individual who thrives in a team environment and enjoys solving complex problems.

Website Developer – MAMA (Marketplace Mahasiswa) January 2026

- Built an e-commerce platform focused on university students with three user roles: seller, buyer, and validator (admin from student organization/BEM).
- Transactions are verified by validators to ensure security and accountability.
- Developed using the Laravel framework with Blade engine, PHP as the primary language, and MySQL as the database.

Website Developer – TOKOKU March 2025

- Led a team in developing a full-featured e-commerce website named TOKOKU.
- Built with the Laravel framework using SQLite as the database, Bootstrap 5 for the frontend, and JavaScript for interactivity.
- PHP served as the primary backend language.

Desktop App Developer – Banking System Application April 2024

- Developed a GUI-based banking system application using Java Swing.
- Implemented core features: customer account registration, authentication (PIN/password), deposit, cash withdrawal, inter-account transfers, balance inquiry, and transaction history.
